### Ried **GRILLENPARZ 1.ÖTW**

Kremstal DAC

Riesling 2019

#### Origin & Vinification

The cru "Grillenparz" in Stein an der Donau, which was mentioned for the first time in 1180 and is therefore one of the most venerable locations of Kremstal, is made up of Paragneiss in the deepest layers of the soil, as well as the calcareous carbonate Conglomerate of the Hollenburg-Karlstetten formation. This unique geological surface is covered by sandy from the river Traisen.

Originally called "ad grillenporce", it appears to have been a steep area where a lot of crickets sunbathed. No wonder that the chirping animals feel comfortable here: the cru is south-facing, and thanks to the enormously high proportion of rock, the soil warms up quickly and radiates cozy warmth long after sunset.

Weingut Stadt Kreams cultivates a total of 3.24 ha in this cru. In summer, this wind-exposed location dries out quickly after rainfall.

The Riesling Grillenparz was selected by hand from this great cru on 14<sup>th</sup> October 2019. The fermentation took place in stainless steel tank, whereby the contact with the fine lees was 5 months until the bottling in the following July.
